Reliable Toy Co. Limited-Toronto, Canada

EASTER PLUSH 1955
35 YEARS
CONTINUOUS SERVICE

After thirty-five wonderful and exciting years in the Toy business, it is interesting to pause for a moment and ponder over the skill of hand and mind, the loyalty, devotion and effort that go into the creation of toys which are enjoyed and admired by children all over the world.

Behind these Reliable products are years of devoted effort on the part of hundreds of employees, many of whom have been with the Company practically all their working years.

From a tiny workshop in Toronto back in 1920 Reliable moved many times to larger quarters. Now the Company occupies over 150,000 square feet to manufacture Reliable toys.

Through these years it has always been our creed to give the most in value and quality for the lowest possible price. This is the principle which has inspired ceaseless research, development and expansion.

Reliable dolls unsurpassed for beauty are completely designed and produced from head to toe under the roof of Reliable Toy Co. and no matter how small an item to improve a doll is necessary our skilled craftsmen set to work to create that part to make the finished article the best which can be bought.

Today, little mothers are thrilled with dolls that walk, cry, wet, sleep, do not break, and have lovely saran hair actually rooted in soft vinyl heads to be combed, curled and waved.

In 1941 plastics inevitably came into the business; these were war years and plastics vital to the success of our armed forces poured from our plant by the hundreds of thousands. As war demands decreased we gradually stepped up our output for civilian lines and through this experience we gained much know-how in plastics for playthings.

Another important step was made by Reliable in 1952. Vinyl became an important factor for beach toys and wading pools. Since this time Reliable inflatable toys have become increasingly popular and now colourful and strong inflatable toys and pools made by Reliable bring summer enjoyment on beaches and in gardens everywhere.

Our progress did not stop and in 1953 Polythene was added to the list of Reliable's proud achievements. This resulted in a line of feather weight, unbreakable toys which combine many outstanding features of proven high resistance to all kinds of abuse. Much to the delight of parents, children can now play quietly with polythene toys of detailed design which will not scratch furniture, are non-toxic, colourfast and safe.

Last year our research took us further; to the development of plastisol. With soft pliable plastisol Reliable has been able to manufacture thousands of character animals and novelties for little tots to play with safely. This new material is colourfast, washable and unbreakable.

Reliable's achievements are many, but it has only been through the loyalty and devotion of our customers and employees.

It is our sincere wish in the future, as in the past, to continue to serve to customers' satisfaction and carry on a policy proven trustworthy by time.

S. F. SAMUELS,
President
