Pedagogical Intent

Students learn to interpret objects that belonged to immigrants to Canada, and learn about immigrants who came to Canada between 1800 and 2000, by studying objects from the Canadian Museum of Civilization’s database, completing a Discovering Objects Activity Sheet, and making a presentation of artifacts.

Grade: Grades 5-8; Quebec Elementary Cycle 3, Secondary Cycle 1

Subjects: Social Studies, Geography, History and Citizenship Education, Language Arts, Mathematics

Themes: Immigration to Canada 1800-2000, immigrants, diversity, multiculturalism, cultural groups in Canada, change and continuity, meeting needs, resources

Objectives and Competencies: Use information, use information and communication technology, communicate appropriately; observe, describe, summarize, reason, use critical thinking, use creativity, cooperate with others, listen to others, use oral communication

Duration: 120-180 minutes

Web Resources:
- Crossroads of Culture web site
  www.civilization.ca/tresors/immigration/index_e.html

Optional Technical Equipment
- One computer with Internet access for each pair of students, needed for 60-90 minutes; if computers are available, the artifact information package for each student is not required
- A projector and computer with Internet access

Student Handout
For each student:
- An artifact information package from the Selected Artifacts list (Teacher Preparation, Step 3)
- Discovering Objects Activity Sheet

Teacher Preparation:
1. Ensure students have been introduced to the subject of immigration to Canada.
2. Visit the Crossroads of Culture web module. Select the Objects tab, and view the available categories of objects.
3. Familiarize yourself with the Discovering Objects Activity Sheet.
4. Print out two or three copies of each artifact information package from the Selected Artifacts list below, to provide one package per student.

Tibetan costume
(87-8.0)
Selected Artifacts

<table>
<thead>
<tr>
<th>Chinese vase</th>
<th>Korean spinning top</th>
<th>Icelandic wedding costume</th>
<th>Tibetan costume</th>
</tr>
</thead>
<tbody>
<tr>
<td>(80-441.1-3)</td>
<td>(80-364)</td>
<td>(69-94.0)</td>
<td>(87-8.0)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Touareg one string fiddle</th>
<th>Vietnamese long zither</th>
<th>Mossi talking drum</th>
<th>German fish trap</th>
</tr>
</thead>
</table>

Optional: Consult the Crossroads of Culture web module and select objects related to a subject you are exploring. Select an object link to see a larger image. In this screen, select the "Detailed Description" link to see an artifact record for the object. Make one copy of an artifact record per pair of students.

Optional, if computers with Internet access are available: Instead of printing out artifact records for students, allow each pair of students to select an artifact record.

Procedure

1. **Begin with a classroom discussion about museums and artifacts.** Have any students visited museums recently? Have they seen objects on display? Explain that these objects are artifacts. Although any object can be considered an artifact, objects in museum collections are special. Brainstorm with your class about what makes museum artifacts special. Some ideas: museums collect objects that are representative of specific cultures, places or events; they document them, store them in special conditions to preserve them, do research on them, and display them.

2. **Introduce the artifact collection of the Canadian Museum of Civilization.** Explain that the Canadian Museum of Civilization has thousands of artifacts related to immigration to Canada: everything from clothing to furniture to dishes to tools. Surprisingly, most of these artifacts are not on display in the museum; that’s because there is not enough space to display all of the museum’s artifacts. Fortunately, many of them are available on a database on the museum’s web site, and today, students will have the chance to look at some of these objects.

3. **Introduce the artifact database records.** Provide an artifact information package to each student. Explain that records for nine different artifacts have been distributed. Each artifact is an object that was either brought to or made in Canada by immigrants. Ask students to look at the first page: the artifact record. Review the information available, and ensure students understand what each term means. Turn to the next page, and explain that it provides a larger view of...
the artifact.

4. **Introduce the Discovering Objects Activity Sheet.**
   Give students the Discovering Objects Activity Sheet and review the questions with them. Ask them to complete it individually, using the artifact information package. Because the database records only include information that was provided to the museum about each object, students won’t find all information they need to answer each question. Students will have to use the information available.

5. **Ask students to compare their interpretations of the artifacts.** When students have completed their Activity Sheets, ask students sharing the same artifact to form groups. For example, all students with the talking drum form a group. Encourage students to share their answers to each question and to revise their answers if they wish.

6. **Students present their artifacts.**
   Ask each group to share its artifact with the class. Encourage students to share some of the questions they would like to ask the makers or owners of their artifacts.

---

**Extension Ideas**

**Object or Artifact?** Show the class an everyday object and a projection or picture of a museum artifact from the database. Ask students to brainstorm about the differences between an everyday object and a museum artifact.

**Create an Artifact Information Record:** Ask students to select a special object they have at home; they can photograph it or draw a picture of it. Using the Canadian Museum of Civilization artifact record as a guide, have them create an artifact information record of this object. Ask them to interview parents and others who have information to share about the object, and have students add the information they feel is necessary to fully convey the importance of the object.

**What Is It?** Assign the What Is It? Activity Sheet after the completion of this activity. The What Is It? Activity Sheet challenges students to identify unusual objects from the database and builds on their skills at using the database.

**English Language Arts:** Look at the origin of the word artifact: arte from Latin art, factum from factere to make.

**French as a Second Language:** Use the French version of the artifact information record. Ask students to describe the artifact in French, using the terms on the information card to assist them.

**English as a Second Language:** Ask students to identify an artifact that is similar to an object they use at home. Ask them to describe their household object, and explain what it is used for, how it is used, what it is made from, and who uses it. The class can ask questions and compare the artifact and object.

**Arts Education:** Ask each group to present an artifact and one or more related people in a manner of their choice. Brainstorm with them on the possible formats and subjects. Some suggestions for format: a show and tell using a papier-maché reproduction of the artifact or a modern version of the artifact, a dramatic representation, a poem, a song or a dance. Suggestions for subject: focus on the maker, the user, the community that used it, a grandchild of the maker, or a collector that has purchased the object.
