- 11.1 Environmental sustainability is a critical consideration for the **Museum**, given its pivotal role in preserving cultural heritage and educating the public. The objective of the **Museum's** Environmental Sustainability Policy is to advance environmental protection and support sustainable development by integrating environmental performance considerations into the procurement decision-making process. This section supports that policy by promoting environmental sustainability and climate adaptation through responsible sourcing, energy and material efficiency, and life-cycle environmental stewardship. The **Contractor** is required to contribute to these objectives as part of its obligations under the **Contract**.

In this case, i.e. in the event of termination of the **Contract**, it will be understood and agreed that there should be no claims for damages by the **Contractor**. The parties will be deemed to be released from their obligations hereunder, including, but not limited to, indirect, special, or consequential damages or loss of profit caused by the termination of the **Contract**.
